Gladiolus Price List

SEASON 1929

The

Quality of Bulb
Quality of Bloom
Quality of Variety

FOREWORD. I take this opportunity of thanking everyone who has given me orders in the past, also the many kind words of appreciation expressed by so many who have taken the trouble of writing. It is a pleasure to receive such letters and I shall try to continue to serve you with only the finest in "glads". The past season has been one of abundant rainfall which of course helps to make a crop of quality bulbs, which I am sure will please this season. Never had any better quality!

It was my intention of releasing a few of my own seedlings this season, but judging from requests received, I feel my stock of these is still too small, so the introduction will be deferred until next year, but I still wish to remind you that I have taken into consideration the marked improvements made in glads the past few years and only promise something really worth while.

I have never yet made out a Price List and felt that the price on every variety was absolutely correct. It is part of my business to keep tabs on prices and I try to strike an average price of what other reliable growers are charging. After all, it's not so much what you pay for a variety, it's what you get for your money, that counts.

Small orders are welcome, even if only for one bulb, but don't get the idea the big ones aren't welcome too! Order early! Every season some varieties are sold out. You stand a better chance of having your order filled in full by sending it in now. A 25% deposit will hold orders for future delivery.

I have shortened my descriptions of the older varieties, as these are too well known to need comment, and directed your attention to the newer ones. Of course some of the older ones are as good, if not better, than many of the newest introductions. Understand! these are merely *my* opinions, and climate, soil, tastes and ideals sure do differ at times!

Help us get a uniform pronunciation of the word gladiolus. Pronounce it Glad-y-oh-lus, accent on the oh, and use same form for both singular and plural. The American Gladiolus Society went on record as favoring this pronunciation at an annual meeting in 1925.

TERMS. Cash with order, delivery prepaid. No substitution of varieties. I believe in extra count! No orders taken for bulblets after April 1st.

DISCOUNTS. When cash accompanies order the following discounts can be taken.

\$10 to \$25—10%	of the amount of your order additional, your selection from Price List.
\$25 to \$50—15%	" " " " "
\$50 to \$100—20%	" " " " "

On orders over \$100 write for special quotations for entire lot.

WARRANTY. I exercise great care to have everything true to name and believe everything listed here to be 100% true, however should stock prove untrue or otherwise unsatisfactory, my liability to cease upon free replacement, or refund of purchase price, but, I won't be satisfied until you are.
